

Post Disaster: A Poverty Simulation

Jeffrey Pellegrino | 2235: 490-001 | Tuesdays 12-2pm

Step into the investigator and facilitator roles to gain a deeper understanding of individuals experiencing poverty pre/post-disaster. Discover the relationship amongst first responders and services provided by government, non-profit, and private organizations in the aftermath of a disaster. (Hint: It isn't pretty nor just.)

Working with community partners, we'll use this learning to design and execute a real-life poverty simulation that will help others better understand poverty from a personal/ first hand perspective.
